

POSITION NOTICE

Location of Position: Institute for Genomic Biology at the University of Illinois

Title of Position: Research Programmer

Duties and Responsibilities: The Research Programmer will be a primary contact for help desk related items in the IGB. Additional responsibilities would include the maintenance of a mixed network of Unix, Windows, and Macintosh workstations; hardware/software installation and troubleshooting; assisting in security monitoring; assisting in data backup management; and system configuration, integration and maintenance.

Qualifications: Experience installing software, installing hardware and placing computers on a network. Skills in HTML, PHP, Python, and or Perl are a plus as is experience working with databases such as MySQL or Oracle. Good interpersonal, teaching, and communication skills are also necessary. A background in Biology, Engineering, Computer Science, or Information Technology is highly preferred. A bachelor's degree is required.

Salary: Commensurate with experience

Additional Information: This is a regular, full-time, 12-month academic professional position, beginning August 1, 2008 or negotiable after closing date. Please send a letter of interest (including email address), resume, and the names and contact information for three references. To ensure full consideration, applications must be received July 14, 2008. Applicants may be interviewed before the closing date; however, no hiring decision will be made until after that date.
